

Cantaloupe Plots

ATG earliest Westernland Plots

May 19, 1932

Two beds to right of centre with
green vines and arches in one
next to centre are 7534 line
(moss + selections) which
highly resistant to mildew.
All rows to right of centre
are comparable to the Best
with foliage practically
killed by mildew. Up until
today HB given same treatment
resistant but today for first
time ~~two~~ ^{only} resistant are being irrigated
HBs having been abandoned.
